

HAT SIZE CHART

Proper Head Measurement

First, you'll need a friend, and a soft tape measure. You know - the type the fella uses to measure your trouser inseam.

Look straight ahead and have your helper measure your head. Using the soft tape - they should measure over your hair, just above your ears, and a half inch above your eye brows.

Make sure the tape is tight, but not uncomfortable. Measure twice - just to be sure.

Using the chart below, match your head measurement to the corresponding hat size.
