INTRODUCTION

Genigraphics® has provided this template to assist in preparation of a medical or scientific research poster. The dimensions are set to 36” high by 48” wide but prints can be scaled up or down in size to any dimension with a 3:4 aspect ratio. For example, if you order a 30” x 40” poster using this template, we will print the file at 83.3% of its original size. **The most critical factor is that your template and poster dimensions must be proportional:**

$$\frac{\text{template height}}{\text{template width}} = \frac{\text{desired print height}}{\text{desired print width}}$$

Order your poster from Genigraphics and we will perform a free design review and advise you if we see anything that may be a concern for printing. We’ll even help tidy things up.

We have more history with PowerPoint® than any other printing company. In fact, we helped Microsoft® design the software and we created all of the original color themes, templates, and clip art galleries. We know how to make your printed poster look just like it does on screen. Other printing companies and copy centers will blindly convert your file to another format prior to printing. This can result in text shifting, symbols changing, and altered colors. We know the secrets to avoid those issues. So choose Genigraphics for the most accurate reproduction available.

reproduction available.

METHODS AND MATERIALS
