

Senior Exhibition Outline Template

Beginning on the next page is an outline template (in Microsoft Word format), which is filled in with a sample to show you what a final outline looks like. Here is how to fill in your own outline:

- **Double click** on a **word** / **triple click** on a **sentence** to highlight it. (Or swipe across it with a mouse's left key held down.)
- **Type your sentence.** (The original words will automatically disappear; if they don't, use the Delete key to eliminate them.)
- When you don't need an outline subdivision (such as "C" or "3"), delete the line.
- When you need to insert a new subheading, place the cursor at the end of the sentence immediately above where you want to insert, press Enter, go the Style drop-down menu (typically located next to the Font drop-down menu) at the top of the screen, and select the appropriate style:
For I, II, III, etc., choose Outline 1
For A, B, C, etc., choose Outline 2
For 1, 2, 3, etc., choose Outline 3
For a, b, c, etc., choose Outline 4

NOTE: You will need to manually enter the correct letter or number, and you may need to change letters and numbers above and below your new entry. At times, you may need to use the Tab and Backspace keys to align entries properly.

- **TROUBLESHOOTING TIP:** If Microsoft Word performs undesired formatting, such as inserting unwanted letters and numbers and changing the indentation, go to Format menu, click AutoFormat, click Options, choose the "AutoFormat As You Type" button, and deselect (so that there is no checkmark) these two choices: "Automatic Bulleted Lists" and "Automatic Numbered Lists."
- **SAVE YOUR DOCUMENT ON YOUR H DRIVE.** Choose "Save As" in the File menu and provide a new name.
- For Bibliography entries, click on Format at the top and choose Style from drop-down Scroll down to "MLA Entry" and click.

Banning Jet Skis

I. Thesis Statement Jet skis should be banned in national and state parks because they make too much noise, harm the environment, and harass wildlife.

II. INTRODUCTION / BACKGROUND MATERIAL

- A. This is a jet ski [PowerPoint slide will be shown].
 - 1. Invention of jet ski – historical background
 - 2. How does it work – type of engine etc.
 - 3. Fuel use / pollution
 - 4. Cost
- B. More than 1.3 million jet skis (also called personal watercraft) are in use, with annual sales of about 200,000—one-third of all boat sales.
- C. Jet skis should be banned from lakes and other waterways in national and state parks because they make too much noise, pollute air and water, and harass wildlife.
- D. However, I am in favor of permitting them on the ocean and private lakes, provided they stay away from shallow water.

III. SUPPORTING ARGUMENTS

- A. Jet skis destroy peace and quiet.
 - 1. People go to national and state parks to get away from noise and enjoy the sounds of nature.
 - 2. A jet ski makes loud, intrusive noise.
 - a. A person on shore 100 feet away hears 80 decibels (equivalent to a police siren).
 - b. Two or more jet skis traveling together can create over 100 decibels (equivalent to standing next to a chainsaw).
 - c. These decibel levels were figured by the American Industrial Hygiene Association.

Template Example Only ... Template Example Only

B. Jet skis cause serious pollution of air and water.

1. One day's worth of jet ski production of hydrocarbons and nitrogen oxide equals what a car would produce in 100,000 miles.
2. Jet skis have inefficient, two-stroke engines, which dump up to one-third of their fuel—unburned.
3. Each year 165 million gallons of oil are spilled into U.S. waterways by jet skis.
4. Jet ski emissions can harm humans, animals, and plants, says the Environmental Protection Agency.
5. A lot of the toxic chemicals are long-lived.
 - a. Example: polycyclic hydrocarbons can kill zooplankton, an important part of the food chain.
 - b. In lakes that have heavy jet ski traffic, fish populations have declined.

C. Jet skis harass wildlife.

1. They are so small, they can enter shallow waters.
2. These waters are used by wildlife for reproduction and nesting.
3. Jet skis cause alarm and flight and sometimes death, says Dr. Burger.
 - a. Many birds abandon their nests permanently.
 - b. This exposes their young to predators and bad weather.

IV. NEW KNOWLEDGE

A. Survey of Queechy Lake residents

1. 82% of residents want jet ski legislation in the town of Canaan
2. 60% of residents would agree to state limits on the use of personal water craft

B. Proposal for local legislation / enforcement

V. CONCLUSION

I. Summary

- A. Jet skis should not be allowed in national and state parks.
- B. They create noise, cause pollution, and harass wildlife.

II. Clincher

- A. Please sign a petition I am sending to our U.S. / state legislators asking them to support a ban.
- B. When we go to these parks, we have a right to find peace and quiet.
