Workout Log Template #1

How to use the Daily Workout Log Template:

- Before starting your workout, fill in the sheet with all your workout information, leaving just the boxes in the center of the sheet under "Exercises" blank. When you are at the gym, fill in all the blank boxes.
- "TR" stands for Targeted Reps, or the number of reps you plan on completing for a given exercise set, "AR" stands for Actual Reps you complete, and "W" stands for the weight you used, "F" stands for completing as many reps as possible to failure, and "RBS" stands for Rest Between Sets. Finally, brackets are used to connect exercises that are completed as circuits (i.e. completed back to back with little to no rest).
- When filling in the sheet, "BW" indicates body weight.

Aerobic/Intervals/Stretching

Jump Rope - 1000 Reps (200 reps each set, 60-90 seconds rest between sets)

Stretching - 5 mins of stretching (Hamstrings, Quads, Calves, Hips, Shoulders)

Comments/Notes

Pairing Bench Step ups with Push ups really taxed my cardiovascular system. I felt very out of breath, which affected my ability to complete more push-ups and generally my strength levels the rest of the workout. I need to work on improving cardio and consider pairing push ups with a less taxing exercise.

Workout Log Template #2

How to use the Monthly Workout Log Template:

- Before starting your workout, fill in the exercises you plan to complete along with the targeted sets and reps.
- Within the first Workout 1 row, you will write down the actual weight and reps you
 completed for each set. You will then move on to the next exercise and fill in the weight and
 reps for each set for the row Workout 1. If you intend to pair exercises together in a circuit,
 you can use brackets as I show in the example sheet.
- You'll notice that there are 10 exercise rows with 5 sets across, which equates to 50 total sets that can be completed on this sheet. For your workout, you will more likely only use about half, or less of the sheet. I included these extra exercise rows and columns to give you more flexibility when creating your workout.
- When filling in the sheet, "BW" indicates body weight and "F" stands for completing as many reps as possible to failure.
