## "MY DOG IS HOW OLD?"

Canine aging is much more rapid during their first two and a half years. Around 3 years of age, the ratio defers from different breeds.

- Small sized dogs $\sim 1$ calendar year to 4 dog years
- Medium sized dogs $\sim 1$ calendar year to $41 / 2$ dog years
- Large sized dogs $\sim 1$ calendar year to $51 / 2$ dog years
- Giant breeds $\sim 1$ calendar year to $7^{112}$ dog years

The relative age of different-sized dogs varies through life. Given the different life expectancies of small to giant breeds, two dogs of exactly the same age may in fact be at very different stages in their lives.

| Dog Years | $\begin{gathered} \text { Small } \\ 3-20 \mathrm{lbs} \end{gathered}$ | $\begin{gathered} \text { Medium } \\ 21-55 \mathrm{lbs} \end{gathered}$ | Large 56-88 lbs | Giant 89 lbs + |
