

Woven Heart Basket

Use the templates at the bottom of this project. Each template will make a different sized basket. You will need to make 4 copies of one of the sizes to complete a basket. If you are using standard A4 copy paper, you can print directly rather than tracing by hand.

You will need:

- decorative paper in 2 different colours or patterns
- scissors
- glue stick

Method

1. Transfer and cut your chosen size of template onto each of the papers. You will need 2 of each paper type.

2. Weave the 6 strips of paper together.

3.

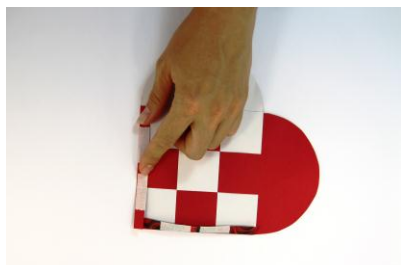

4.

5.

6. Stick small pieces of tape to the gaps on the overhanging pieces.

7. Fold the overhanging edges back

8. Run a line of glue along the folded edge.

9. Glue the fold edges together, so the hearts are facing outward.

10. Glue or tape a handle to the inside of the basket. Use the left over paper or some ribbon or string.

11. Fill the basket with your choice of treats.
